

Lymphedema Compression Pump

The Lymphedema Intermittent Pneumatic Compression (IPC) Pump is used to treat chronic lymphatic and venous disorders of the lower extremities and chronic lymphatic disorders of the upper extremities.

Features

- Use indicator timer which shows patient use and compliance.
- Quiet, wave-like gradient sequential inflation/deflation cycle provides patient with comfortable massage-like therapy.
- Easy-to-read LCD screen that allows the user to see real-time pressure in each individual chamber.
- Convenient digital controls, built-in timer feature for easy therapy time control.
- Automatic shutoff and emergency stop feature for maximum user safety assurance.
- Vacuum mechanism evacuates air from the garments upon shutoff of the system, allowing for greater ease in applying and taking off the garments.
- Quick-release hose connectors allow for easy removal of the garments for cleaning as needed.
- FDA and CE Approved.

Specifications

Dimension: 10" (W) x 9.5" (D) x 4.5" (H)
Weight: 5.5 lbs
Inflation Cycle: 60 seconds
Rest Time: 12 seconds
Cycle Time: 15 seconds / chamber
End Therapy Vacuum Time: 180 seconds
Treatment Time: 0.5-3 hours

Pressure Range: 20-80 mmHg
Sleeve Prefill: To 10 mmHg
Gradient: 7%; example 3 mmHg at 50mmHg Distal Pressure
Electrical: 120VAC, 60Hz, 45 VA maximum
Fuse Rated: 250VAC, 1.0 AMP, SLO-BLO
Protection Against Electric Shock: Class II
Operation Mode: Intermittent Gradient Sequential
