Reduce Max

PRESSURE REDISTRIBUTION SURFACE

Why the REDUCE MAX?

HIGH QUALITY, HIGH DENSITY foam pressure redistributing support surface.

DESIGNED WITH THE HEEL-EASE® unique heel slope which redistributes and reduces pressure in the critical heel section.

BUILT-IN LUMBAR SUPPORT helps reduce lower back pain.

FIRM BORDERS provide added stability.

LONG LASTING SUPPORT and clinical performance provide years of resident comfort and pressure injury prevention.

The Reduce Max Pressure Redistribution Mattress

is designed for patients at risk of developing pressure injuries and for treatment of up to a Stage 2 pressure injury. The low moisture, antimicrobial, vapor permeable, 4-way stretch cover facilitates cleaning and enhances patient comfort.

The Patented Anatomic Zoning Mattress consists of **FIVE DISTINCT PRESSURE ZONES** to redistribute weight and reduce overall pressure.

Available with a **2" SIDE BOLSTER** - Head and foot bolsters with a center exit, reduces fall risk without being classified as a restraint.

Weight Capacity: **400 LBS**

Sizes Available: **36" X 80"; 36" X 84"; 36" X 88"; 42" X 80"; 42" X 84"**
